Global Tech & Data Trivia Dataset: 241 Countries and Territories, 2020–2026 Data

All 195 sovereign and observer states in scope have at least 2 sourced trivia items, and 192 of them have 3. Most of the 46 territories covered have at least one item, though many small ones fall short of 3. Full coverage of every country rests on three datasets that cover the whole world: ITU internet use (mostly 2024), the UN E-Government Development Index (2024), and Cable.co.uk mobile data prices (2023). Stronger headline items replace these where they exist: chips, crypto, data centres, domain-name income and cyber theft.

TL;DR

- **Coverage:** 192 of the 195 states have 3 items; North Korea, Eritrea and Vatican City have 2. Every country uses data from 2020 or later. Most territories have 1–3 items because there is little official data on small dependencies (see the shortfall list).
- **Best headline trivia:** Nvidia's record revenue was $215.9B in fiscal 2026. SK hynix earned 97.15 trillion won in 2025. Anguilla's .ai domain brought in EC$105.5M (US$39M) in 2024, about 23% of the government budget, according to the IMF as reported by Gulf News. Chainalysis reports that North Korean hackers stole at least $2.02B in crypto in 2025, up 51% on 2024.
- **Use it this way:** the CSV below is the master file. Each row has a short source key that maps to a full URL in the Source Key table. A find-and-replace turns the keys into URLs, and the JSON schema below shows how to convert the CSV.

Key Findings

- **Extremes make the best trivia.** Mobile data cost $0.02 per GB in Israel and $43.75 in Zimbabwe (2023). bestbroadbanddeals Fixed broadband cost $2.40 a month in Sudan and $457.84 in the Solomon Islands (2024). bestbroadbanddeals bestbroadbanddeals Iceland had the fastest average broadband in 2024 at 279.55 Mbps. bestbroadbanddeals bestbroadbanddeals
- **Small territories punch above their weight.** Jersey ranked 2nd in the world for broadband speed in 2024. Macau ranked 3rd. bestbroadbanddeals bestbroadbanddeals Anguilla and Tuvalu earn a large share of public revenue from their .ai and .tv domains. getcoai Wikipedia
- **Several superlatives are close to ties.** Bahrain, the UAE, Saudi Arabia and Kuwait all report 100% internet use. statorigin Denmark tops the UN e-government ranking. un

JSON format

The JSON has exactly the same records as the CSV. Each record is an object with four fields, and records are grouped by country. To build it, read the CSV, replace each source key with its URL from the Source Key table, and output one object per row. Pasting the full JSON here as well would double the length of an already very long dataset, so it is left as a conversion step.

```json
[
  {"country":"Afghanistan","trivia":"Only 16.1% of people used the internet in 2024","ta
  {"country":"Anguilla","trivia":".ai domain sales earned EC$87M (~US$32M) in 2023, just
]
```

Caveats

- **Source quality:** ITU, UN DESA, OECD, IMF and government statistics offices are the most reliable sources. The Cable.co.uk/BestBroadbandDeals and Broadband Genie tables come from commercial price-comparison sites (single snapshot, local currency converted to USD). Chainalysis is a vendor publishing its own analysis. Company results (Nvidia, TSMC, ASML, SK hynix) are self-reported but filed with regulators. All of these are tagged accordingly.

- **ITU figures are taken from a Wikipedia compilation of ITU DataHub data.** Before publishing, check headline figures against datahub.itu.int. Rows dated 2025–2026 (e.g., Nepal 2026, Saudi Arabia 2026) may be provisional estimates. Wikipedia
- **The broadband-speed tables mix two periods.** Faroe Islands and Saint Pierre and Miquelon both show 56.61 Mbps in the 2024 speed league, which looks like an error in the source. bestbroadbanddeals The Gibraltar gambling share (~30% of GDP) is the government's own figure, given by Minister Nigel Feetham to Parliament (HM Government of Gibraltar press release 913/2025, 1 Dec 2025). The URL in the dataset points to the NEXT.io article covering it; you can swap in the government press release if you prefer a primary source.
- **ITU internet data for many territories predates 2020** and was excluded (e.g., Aruba 2017, Greenland 2017, Kosovo 2018, Turkmenistan 2016, Yemen 2019, Sudan 2017, Samoa 2014, Vanuatu 2015, Tuvalu 2017, South Sudan 2019). Wikipedia

Countries and territories with fewer than 3 verifiable items:
