Round 2 Tech Trivia Dataset: Verified Items for Priority Territories, Antarctica and Major Tech Nati

This round produces 3 or more checked, non-duplicate technology trivia items for Antarctica and 23 of the 31 priority territories that were thin in round 1, plus an encyclopedia-sourced block for 22 major tec

TL;DR

- **Delivered:** Block A has 98 items checked during this session for Antarctica (7 items) and the priority territories (Pitcairn, Tokelau, Niue, Saint Helena, Svalbard, French Southern Territories, Montserrat, North
- **Supplement:** Block B adds 66 historical “firsts” for 22 major tech nations (ENIAC, Linux, Skype, Python, Sputnik, QR code and others). They are sourced to canonical encyclopedia pages that were not re-fet
- **Gaps:** No verifiable new items were found for the US Virgin Islands, Guadeloupe, Martinique, Aruba or Western Sahara. Saint Martin, Caribbean Netherlands and Sint Maarten have fewer than 3 items, and m

Key Findings

- **Small territories’ tech stories are mostly about connectivity and domains.** For most of them the trivia is a first cable, a first satellite link or an oddity in their two-letter internet domain. Saint Helena got its
  Ñ
  Tokelau’s .tk was once the world’s largest ccTLD. dn
  Ñ
  Niue’s .nu offered internationalized domain names in 2000. bb-online
  Ñ
  Saint Barthélemy’s .bl and Saint Martin’s .mf were created in 2007 but never activated.
- **Remote French and Norwegian territories matter for space infrastructure.** Kerguelen has tracked rockets from Kourou, Tanegashima and Sriharikota. hawaii
  Ñ
  A station on Svalbard can contact a polar-orbiting satellite on all 14 of its daily orbits. aiaa
  Ñ
  Saint Pierre and Miquelon was the hinge of France’s first transatlantic telegraph cable in 1869. atlantic-cable
  Ñ
- **Antarctica works best as “big science computing” trivia.** Good examples are IceCube’s 5,160 buried sensors (2010), the South Pole Telescope’s first light (2007) and its role in the Event Horizon Telescope,
  wisc+3

  Ñ
- **Several sources conflict, and the affected rows are worded to reflect it** (details in Caveats). Examples are Saint Helena’s cable landing date and branch length, the year Kerguelen’s CNES station opened,

United States,2,"On 29 October 1969 the first ARPANET message was sent from UCLA to the Stanford Research Institute. The system crashed after just two letters, 'LO'.",Historical,https://en.wikipedia.org/w
United States,3,"Hewlett-Packard was founded in 1939 in a Palo Alto garage, now known as the 'birthplace of Silicon Valley'.",Historical,https://en.wikipedia.org/wiki/Hewlett-Packard
```

JSON: each CSV block converts directly to a JSON array of objects with the keys country, trivia_number, trivia, tag and source. The CSV is the canonical deliverable.

Places with fewer than 3 verifiable new items this round

- **Zero items:** US Virgin Islands, Guadeloupe, Martinique, Aruba, Western Sahara. Unverified leads to research: the St. Croix VLBA radio antenna (USVI), the Kanawa cable between Martinique and French Guia
- **Fewer than 3:** Saint Martin (2), Caribbean Netherlands (2), Sint Maarten (1).
- **Not yet covered in round 2:** every UN member state not listed in Block A or Block B, and these named territories: Taiwan's neighbours Hong Kong and Macau, Greenland (one lead: PHP creator Rasmus Lerdo

Recommendations

- **Publish Block A now.** It is the high-value gap-filler for round 1's weakest territories, and every row was checked against a source during this session.
- **Link-check Block B before it goes live.** The facts are standard encyclopedia history, but the URLs are canonical article addresses that were not re-fetched here. For pages that will be seen a lot, consider sw
- **Run round 3 country by country, using a "first cable / first satellite / domain oddity / famous native inventor" template.** That pattern reliably produced 3 or more items for even the smallest territories he

Caveats

- **Conflicting sources:**
  - Saint Helena's Equiano landing appears as 26 August and 29 August 2021 on government pages. The row uses 29 August, from the dated press release. The branch length is 1,154 km per the government and 1 sainthelena+2

N̈
- Kerguelen's CNES station dates from 1992 per the European Polar Board but 1994 per SCAR. europeanpolarboard
